

DISTORTING MIRRORS

feel good about yourself

feel good about yourself

InterAction Distortingmirrors

International started the production of distortingmirrors in 2010. Since then we have a huge core range in stock which is still growing.

As well as our most popular **AMSTERDAM** model we have added the **PARIS** model, for example in 2012 and in 2021 we are developing frameless distortingmirrors.

We aim to be the most versatile distortingmirrors supplier in the world and invest heavily in the further development of new innovative distortingmirrors.

Mid 2019, in cooperation with a fellow company from the advertising world, we have developed a **distortingmirror** with a screen in it that is also be **interactive**.

We have large stocks and fast delivery time, as well as an excellent service for you as a customer.
